“Plastic Optical Fiber for Home and Auto” the Theme of POFWorld 2005

The fifth annual POFWorld trade show will be held at the Santa Clara Convention Center, in Santa Clara, California June 21-23, 2005. The theme of this year's show will be "POF for Home & Auto."

The POFWorld show consists of tutorials, conference and exhibits:

Tutorials (June 21, 2005)

Six tutorials are planned including, "POF Markets and Technology Trends", "POF in Automobiles", "POF in Home Networks", "Designing with POF", and "POF for Installers."

Conference (June 22-23, 2005)

Sessions will include POF applications and technology. Applications will include automobiles, home networks, industrial controls, computer networks, interconnects, and consumer electronics. Technology presentations will feature graded index fibers commercially available, sources, and connectors. A highlight of the conference will be papers promoting the use of the MOST standard for consumer electronics.

Exhibits (June 22-23, 2005)

The highlight of the exhibits will include for the first time, demonstrations of "POF for Home Wiring" where HDTV is delivered over a home network using ethernet over 1394. Another first will be the commercial availability in the U.S. of graded index POF using both PMMA and PF materials.
